

5 ways to use alphabet cards

QUICK, ACTIVE PRACTICE FOR HOME OR CLASS

Name hunt

1

Spread 5-8 letters face up. Ask the learner to find the first letter in their name, a classmate's name, or a familiar place. Mix the letters and repeat.

Case match

2

Use separate uppercase and lowercase cards. Begin with 3-5 pairs. The learner matches each capital letter to its lowercase partner.

Letter neighbors

3

Show one card and ask what comes immediately before or after it in the alphabet. Let the learner check with an alphabet strip when needed.

Quick sort

4

Sort cards by a visual feature: straight lines, curved lines, or both. Ask the learner to explain one choice.

Teacher-led sound link

5

Show a letter and model the sound used in your trusted curriculum. Have the learner repeat it and identify the letter. Keep vowel and multi-sound letter instruction aligned to your sequence.

About audio: ABZ's online alphabet activity intentionally uses visual practice without recorded phonemes. English sound-spelling relationships vary by word and instructional sequence. Model sounds using the pronunciation and program you trust.

Keep sessions short: 3-5 minutes is plenty. Revisit less-secure letters more often.
